Temperature Regulator

OB-3,3G

| Direct acting type | Pilot operated type | Heating | Cooling |
|--------------------|---------------------|--------------|--------------|
| Bellows | Diaphragm | Single valve | Double valve |
| Soft seat | | | |

Features

- 1. Piping can be easily connected due to a union type connection screw.
- These temperature regulators do not require any adjusting tool because equipped with an adjusting handle which leads to easy adjustment.
- Since these temperature regulators adopt a dual-valve structure, the flow rate is larger than that of single-valve temperature regulators.
- Excellent accuracy since special packing is used for spindle gland packing which affects opening/closing operation of the valve.
- OB-3G ensures distinguished temperature resistance due to an external pressure type bellows.

■Specifications

| Model | | del | OB-3 | OB-3G | |
|-------------------------------------|-------------------|----------------|--|------------------------|--|
| Application | | Cooling | Cold water, Refrigerant | | |
| | | Cooled | Cold and hot water, Oil, Non-dangerous fluid | | |
| Max. pressure Body Thermal valve | | Body | 0.7 MPa | | |
| | | Thermal valve | 1.0 MPa | | |
| Maximum temperature | | emperature | 180°C | | |
| Temperature | | For liquid | 40-120°C | 15-100°C | |
| adjustir | ng range | For air | 40-120°C | 15-100°C | |
| Ambient temperature | | emperature | Set temp10°C or less | Set temp. 30°C or less | |
| Body | | Body | Bronze | | |
| | Valve, valve seat | | Phosphor bronze | | |
| Therma | Va | alve spindle | Stainless steel | | |
| | Bellows | | Phosphor bronze | | |
| | Thermal valve | For liquid | Stainless steel | | |
| | | For air | Stainless ste | eel with fin | |
| Standard capillary length | | pillary length | 2 m | | |
| Connection | | ection | JIS Rc screwed (union joint) | | |

· Valve seat leakage: Refer to P.13-43.

 If the ambient temperature is higher than the set temperature or less than 40°C, use the OB-3G (with external pressure type bellows).

· Available with capillary of up to 5 meter. (Please refer to P.28-46 for errors of set temperature).

- \cdot Available with temperature adjusting range of 30°C. (For OB-3 only).
- \cdot Available with thermal well (SUS304 made or with a PTFE cap) for liquid.

Temperature Adjusting Range

· OB-3

| Temperature | Withstand | | |
|-------------|-----------|------------------|--|
| For liquid | For air | temperature (°C) | |
| 40- 60 | 40- 60 | 70 | |
| 50-70 | 50-70 | 80 | |
| 60- 80 | 60- 80 | 90 | |
| 80-100 | 80-100 | 110 | |
| 100-120 | 100-120 | 130 | |

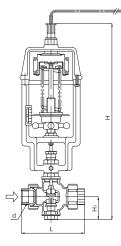

• The term "Withstand temperature" means the temperature from pressure resistance of the bellows.

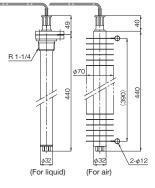

· OB-3G

| Temperature adjusting (°C) | | Withstand | |
|----------------------------|---------|------------------|--|
| For liquid | For air | temperature (°C) | |
| 15- 35 | 15- 35 | 50 | |
| 20- 40 | 20- 40 | 50 | |
| 35- 55 | 35- 55 | 70 | |
| 40- 60 | 40- 60 | 90 | |
| 50-70 | 50-70 | 100 | |
| 60- 80 | 60- 80 | 110 | |
| 70-90 | 70-90 | 120 | |
| 80-100 | 80-100 | 130 | |

• The term "Withstand temperature" means the temperature from pressure resistance of the bellows.

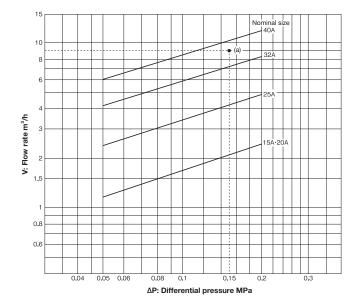

Dimensions (mm) and Weights (kg)

OB-3G has a little difference in bellows structure.

| Nominal size | d | L | Hı | Н | Weight |
|--------------|----------|-----|----|-----|--------|
| 15A | Rc 1/2 | 148 | 55 | 510 | 11 |
| 20A | Rc 3/4 | 148 | 55 | 510 | 11 |
| 25A | Rc 1 | 160 | 60 | 520 | 12 |
| 32A | Rc 1-1/4 | 195 | 60 | 520 | 12 |
| 40A | Rc 1-1/2 | 210 | 65 | 530 | 13 |

How to use the chart

When inlet pressure is 0.3 MPa, outlet pressure is 0.15 MPa, and flow rate is 9 m³/h, first find the intersection point (a) with the differential pressure (Δ P) 0.15 MPa (0.3 MPa – 0.15 MPa) before and after valve and the flow rate 9 m³/h. Since this intersection point (a) locates between nominal sizes 32A and 40A, select the larger one, 40A.

* Chart of the flow rate is a reference value.
